QUARTERLY REPORT TO 30 JUNE 2016

HIGHLIGHTS

- **Greenhills Platinum and Cobalt Project, New Zealand.**

New Zealand tenement has been granted on application to explore the potential of PGE and cobalt.

- **Endeavour Gold and Antimony Project, New Zealand.**

Siburan has purchased the Endeavour Antimony and Gold project for AUD \$20,000.

The company is looking forward to working on the project.

Siburan Resources Limited (ASX: SBU, Siburan) is pleased to present its report for the June 2016 Quarter.

Greenhills Platinum and Cobalt Project, New Zealand (Siburan 100%, EP 60113)

Siburan has secured the rights to EP 60113 to hold 100% ownership of the tenement. This exploration permit (EP) is located on the coast approximately 10km northwest from Bluff and approximately 20km southwest from Invercargill. The area is known as Greenhills. The EP is mostly south of the settlement of Omaui.

See Figure 1 for the location map where the project area is identified as Bluff in relation to other known platinum areas.

The concept of the Greenhills project is to explore for the existence of an economical deposit of ural-alaskan platinum deposits and the presence of any cobalt mineralisation. Historical explorations to date have identified some indicative results which the company will follow up with the exploration.

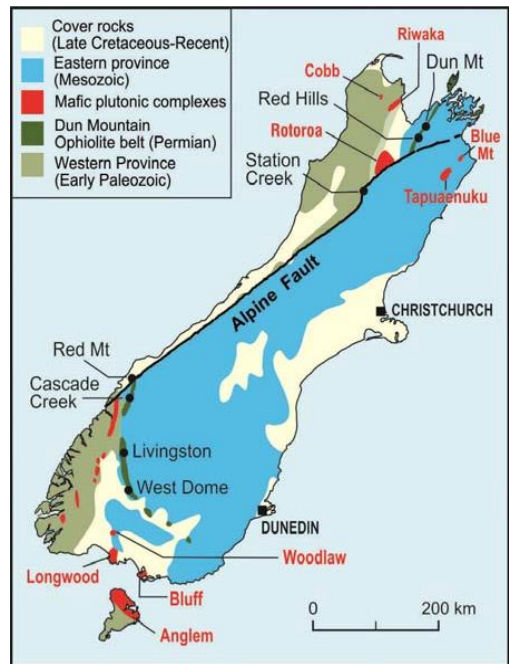

Figure 1: Greenhill EP 60113 area at Bluff in relation to other known platinum sources

The Company intends to seek placer gold, cobalt and platinum group metals.

Endeavour Antimony and Gold Project, New Zealand (Siburan 100%, PP 53311)

Endeavour is located approximately 20km north of the township of Picton on the South Island of New Zealand (Figure 2). Access is by road (74km) and a disused mine track. The area covers approximately 174 km².

Siburan’s reacquisition of the Endeavour project was based on a new geological theory on the mined stopes which presents a potential opportunity for early mining to allow the company to accrue early cashflow.

Ora Banda Gold Project, Western Australia (Siburan 51%, Earning in JV)

The company continues to access the database and will plan to continue its drilling program in the near term.
